

Specially designed to realize RAMP for different test applications, such as pick up /drop off value checking, directional relay testing, maximum torque angle checking etc.

The PW466i is an economic 6-current and 6-voltage channel test set that can automatically test various protection relays. It has features like analog monitoring and recording, real-time output display, ...

PW336i protective relay tester is the best economic model with 6 current channels and 4 voltage channels, capable of automatic testing differential relay easily without changing cable connection.

PW366Ai (12#215;20A, 4#215;300V, 8 fiber optic ports) is the new generation of PW series relay test set which can be used both as a conventional relay test set and IEC61850 testing tools.

PW636i universal relay testing equipment is the most powerful protection relay test equipment. It can do all types of protection relay testing, from electromagnetic relays to numeral relays, microprocessor ...

PW41i is a reliable protective relay test set with high current output (3#215;40A) and high voltage output (4#215;300V). It supports both local control and PC control. With built-in 10.4inch touch screen for local ...

PW636i-F (6#215;32A, 4#215;300V, 8 fiber optic ports) is the new generation of PW series relay test set which can be used both as an conventional relay test kit and IEC61850 testing tools.

PW866i (6#215;32A, 4#215;300V) can be used to test all kinds of relays, and supports testing IEC 61850 combined relays. Its local control system has an 10.4-inch LCD screen based on Windows ...

Protection Relay Tester - PW336i protective relay tester is the best economic model with 6 current channels and 4 voltage channels, capable of automatic testing differential relay easily without ...
