

Factory terminated pigtails can easily be fusion or mechanically spliced to an existing fiber line. Featuring ST style connectors, these pigtails are sold in a convenient 12 pack featuring all 12 ...

Factory terminated pigtails can easily be fusion or mechanically spliced to an ...

The MIL-DTL-83723 Series III Type connector is suited for use on commercial, military, and aerospace interconnect systems that demand high-vibration resistance and reliability in a medium-density ...

Explore our strong design and engineering capabilities in passenger-to-freighter conversions, aircraft interiors, unmanned aerial systems and more.

Our team of experienced engineers, technicians, and mechanics have the expertise and capabilities to meet the most demanding specifications and requirements of our customers. We are certified by the ...

Rated to MIL-DTL-5015 specifications, these connectors are compatible with other products that meet the same standard. They can withstand high-vibration applications and frequent connection and ...

Leviton fiber optic pigtail kits are a good solution for mechanical or fusion splicing applications. Available in a range of multimode and single-mode fibers with SC, ST or LC connectors. Our premium pigtails ...

New High Speed Open Architecture solution for tighter card pitches and chassis designs where space requirements and density are critical. Filtered connectors provide critical EMI and RFI protection, and ...

Available turnkey factory terminated pigtail and jumper assemblies. The Series 806 Mil-Aero is an aerospace-grade micro miniature circular connector with triple-start threaded coupling. The 806 ...

By offering pre-terminated wiring with secure connections, pigtail connectors simplify installation, reduce failure risk, and improve overall system reliability.

Ideal for detecting the position of critical aircraft structures that are mechanically well controlled and have tighter geometric tolerances such as landing gear position. The pigtail connection can be utilized ...
