

Protective relays are essential in power systems to detect faults, isolate problem areas, and prevent widespread damage. Their use spans high-voltage transmission, industrial machinery, ...

From multiple engineering tools for protection to configuration software, power quality measurement solutions and protection relays and control, there's a reason the SIPROTEC family enjoys top ...

Eaton's protective relays provide you with unique microprocessor-based devices that eliminate unnecessary trips, isolate faults, protect motors and breakers, and provide system information to help ...

PRS engineers are experts at applying and setting microprocessor-based protective relays for electric power generation, transmission lines, substations, distribution networks, and industrial power systems.

GE Vernova's Protection, Control, and Metering solutions deliver precise, high-performance automation for today's evolving grid. From advanced relays to multifunction meters, our portfolio helps utilities ...

Power System Analytics specializes in Power System Protection, Automation and Control Design and Testing.

SEL offers complete power system awareness, protection, and automation solutions, with EtherNet/IP and IEC 61850 GOOSE to secure operational technology (OT) high-speed networks. We provide ...

Protective relays and devices have been developed over 100 years ago to provide "lastline" of defense for the electrical systems. They are intended to quickly identify a fault and isolate it so the balance of ...

A fast and selective arc fault mitigation for air-insulated LV & MV switchgear and Relion protection and control relays and sensor technology protect staff and plant facilities for many years.

Protect and control grounded and ungrounded, single- and double-wye capacitor banks. Simplify setup and installation with application-based settings. Expedite necessary maintenance with fault finding ...
