

Purchase from manufacturers of pluggable optical modules with anti-tracking properties

Juniper offers a complete portfolio of standards-compliant optics including direct-detect and coherent optical transceivers, application-specific pluggables, and optical and electrical cables.

Small Form-factor Pluggable refers to a family of hot-pluggable optical transceiver modules designed for telecommunications and data center applications. The SFP family supports ...

By moving the 6.4T optical engine closer to the switch ASIC, these solutions overcome the electrical reach limitations of traditional copper traces, significantly reducing power consumption and ...

FS offers a growing portfolio of optical transceivers, with speed range from 100M, 1G, 10G, 25G, 40G, 50G, 100G, 200G, 400G to 800G and beyond. The fiber optic transceiver modules can work in any ...

This innovative solution enables more simplified and reliable edge and data center networks aligned with a standards-based ecosystem and can help eliminate separate full-function optical transceiver boxes, ...

To reduce power consumption and cost while meeting the demands of high-speed, high-density optical communication connections, as well as the need for optical network flexibility and ...

GIGALIGHT provides 100G, 200G, and 400G pluggable digital coherent optical transceiver modules (DCO) for data center interconnection (DCI), 5G backhaul, metro telecommunication, and other long ...

Get the best of both worlds with compact, power-efficient sleds integrating coherent pluggable optics with cost-effective transponder functionality. Discover the benefits.

Get the highest quality, performance-leading optical transceivers for any network architecture. Find the transceiver model to fit your network.

These small, modular optical interface transceivers offer a convenient and cost-effective solution for an array of applications in the data center, campus, metropolitan-area access and ring network, storage ...
