

The 50GE PAM4 optical module uses the QSFP28 encapsulation mode, LC optical interfaces, and single-mode optical fibers. The transmission distance is 10/40 km, and the maximum power ...

Explore our range of high-quality GPON, EPON, and XG (S)PON OLT products. Find the perfect Optical Line Terminal solutions for your network needs.

The heart of any PON system is the optical line terminal (OLT). Think of the OLT as the brain of the network; it is the concentration point for upstream and downstream traffic.

Zyxel's GPON OLTs offer advanced signal processing for dense deployments. Upgrade to gigabit symmetric services today and prepare for tomorrow's technologies.

Learn how to measure PAM4 signals for high-speed digital networking applications.

This technology was once considered impossible, but Marvell has now proven it in real silicon. Marvell is also working with leading optical and switch companies to cultivate an ecosystem ...

This technology was once considered impossible, but Marvell has now proven it in real silicon. Marvell is also working with leading optical and ...

The optical line terminal (OLT) at each end is connected to 100 Gbps ethernet transport with ROADM nodes every 150-200 km. System engineers report an aggregate capacity around 640 ...

Cortina family of Optical Line Terminal (OLT) SoCs completes the end-to-end solutions for EPON and 10G-EPON applications. Our silicon devices have been interoperability-tested, field-proven and ...

In this blog, we take a higher-level look at PAM4, the modulation scheme that makes short distance 400G networking possible, and discuss how this technology has enabled big leaps in optical ...

Our SDX 6000 Series of software-defined optical line terminals (OLTs) consists of open and disaggregated access devices that support a broad range of PON standards, including 10G Combo ...

Zyxel's GPON OLTs offer advanced signal processing for dense deployments. Upgrade to gigabit symmetric services today and prepare for tomorrow's ...
