

The device performs various protection functions by respective algorithms with the information (currents and voltages) acquired from primary system through current transformer and voltage transformer, so ...

PCS-931S line differential relay integrates main and back-up protection functions, which is designed for overhead line, cables and hybrid transmission lines of various voltage levels and provides ...

The PCS-931 relay provides full-scheme current differential and distance protection solutions for transmission lines with high-speed sub-cycle distance element.

RCS-931 series ultra-high voltage line complete set protection device is a digital ultra-high voltage line complete set fast protection device produced by NARI-RELAYS. It can be used as the ...

Product Summary: STVP-931 380VAC 3-Phase Overvoltage Undervoltage Protection Device Phase Sequence Protector Relay Breaker From FOSBPSDW

The NR RCS-931 relay is an advanced current differential protection with stepped distance elements and overcurrent elements intended for main and backup protection for transmission lines with single ...

The PCS-931 is suitable for single- and dual-breaker applications, providing optional dual CT inputs, dual breaker failure protections, dual breaker auto-reclosing and dual synchro-checks. Additionally, ...

Products Description STVP-931 Din Rail Adjust 3 Phase 380VAC Voltmeter Over Under Voltage Monitor Sequence Protector Meter Protective Devices Relay Product Parameters: 1. Model number : STVP ...
