

Schematic diagram of optical cable splicing with open window

Fastest and most user-friendly fiber optic Network Management Software. Create fiber splice diagrams in few clicks and save weeks of work.

Learn how fiber optic networks distribute data from central offices to end users. This diagram highlights media converters, switches, and cable types.

Splice schematics show a graphical representation of all connections within a given splice point.

Our application automatically generates splice schematics to help you visualize fiber connections effortlessly. Here's a quick overview: 1. Types of Splice Schematics. We offer three types of splice ...

Technical Drawings Technical Resources BIM, CAD, Visio and PDF Files for Copper & Fiber Optic Cabling, Racks & Cabinets

Key details provided for each connection include cable IDs, core numbers assigned, and expected maximum signal loss between 1310nm and 1550nm wavelengths.

A simple splice diagram with 132 fibers and 66 splices. The first drawing, with 2,160 fibers and 562 splices, uses a more efficient format and is easier to read.

Our application is based on a conceptual model which is open and documented. SchemaFiber gives you schematic view of all optical fibre network components (fiber, splice boxes, patch panels, etc.).

A schematic using the ungrouped layout displays all the individual fibers that form a connection from one buffer tube to another. If you select a fiber strand and click on it in the Selection ...

Choose from two-dimensional and isometric product drawings in PDF, DXF, VSS formats, and Building Information Modeling (BIM) Objects.
