

Selection Guide for New Power Private Network Aggregation Switches

Dense, high-capacity, top-of-rack and aggregation switches for spine and leaf data center architectures. Optimize your network with flexible, scalable, and high-performance data center switches.

Smartports provide a set of configurations to optimize port settings for common devices like automation devices, switches, routers, PCs and wireless devices. Smartports can also be customized for specific ...

Planning for future organizational growth and device usage is crucial when choosing the right PoE switch.

Link aggregation is used to aggregate multiple physical ports to form a logical port ...

Link aggregation is used to aggregate multiple physical ports to form a logical port for load balancing, bandwidth expansion, and port protection. Support static link aggregation.

Redundancy and load balancing--The distributed link aggregation technology supports load sharing and mutual backup among multiple uplinks, which enhances the network redundancy and improves link ...

These aggregation switches support advanced VLAN for flexible traffic segmentation, advanced QoS for prioritizing network traffic, IGMP/MLD Snooping for optimizing network performance, and ...

Choose the right Lightware switch with the selection guide from NETGEAR. Optimize your ProAV setup and buy now!

Quickly identify the right Cisco switch for your needs, whether you're looking for a new switch or upgrading an old one for an enterprise LAN, a data center, outdoors, or industrial operations.

Scale easily with built-in rear stacking ports. Switch stacks of up to 624 1/2.5/5/10GbE/25GbE ports can be managed from a single screen using the highly available stacking architecture for high-density ...

High density 1/10GbE and 40GbE switches for campus core, aggregation, and data center top-of-rack deployments to power today's bandwidth-intensive applications.

This model allows the aggregation switches to easily accommodate thousands of devices passing through this layer while simplifying the design, maintenance, and operations. The following figure ...

Combined with H3C AD Campus Platform, it can easily implement a two-layer network architecture and quickly add functions in existing network in order to drastically reduce network management ...

Selection Guide for New Power Private Network Aggregation Switches

Discover the all-new UniFi Pro XG Switch lineup -- high-performance 10GbE switches with PoE++, 25GbE uplinks, aggregation, and WAN redundancy. Powerful, scalable, and starting at just \$499.
