

CommScope offers a portfolio of bare and connectorized splitters/couplers in a wide range of styles and split ratios, and splitter modules for inside plant (ISP) and outside plant (OSP) applications that help ...

This involves having 2 or more splitter combinations to arrive at the target split ratio. A classic example is the use of a 1x4 and 1x8 splitter to comprise a 1x32 final ratio.

Maximize broadband and CATV network performance with this 1x4 PLC Fiber Splitter. Compact, connector-free, and designed for seamless signal distribution across PON and FTTH systems.

GLSUN 1x4 optical splitter is a passive device used in fiber optic networks to divide a single optical signal into four separate paths or, in reverse, to combine four signals into one.

The 1x4 PLC Splitter with SC/APC connectors is a high-performance passive optical device that evenly splits one input fiber into four outputs. Designed for FTTH, PON, and FTTX networks, it features low ...

The NanoSpeed(TM) Series 1x4 solid-state fiber-optic splitter splits the optical power among four outputs with any power splitting ratio. The input is polarization-maintaining (PM) fiber and the outputs are four ...

FS PLC Fiber Optic Splitters, Bare/Blockless/ABS/LGX Splitter/Rack Mount Types, support 1xN light distribution, with low IL and PDL for high-reliability transmission.

This PLC Splitter is a 1x4, with 1 input and 4 output fibers with an even split ratio ...

This PLC Splitter is a 1x4, with 1 input and 4 output fibers with an even split ratio across all fibers regardless of input wavelength. PLC Splitters are available with 900µm loose tube singlemode fiber ...

The 1x4 Steel tube PLC Splitter devices have high performance in terms of low insertion loss, low PDL, high return loss, and excellent uniformity over a wide wavelength range from 1260nm to 1650nm and ...

Find telecom-grade fiber optic splitters with PLC technology, low insertion loss, and Telcordia GR-1209 compliance. Click to explore verified suppliers and customize your solution today.
