

Our Raychem CSJA In-Line Joint Cold Shrink is made of silicone rubber that provides high dielectric strength, high tear strength, low tension set, and excellent low temperature recovery.

The Cold Shrink Joint Easy Tech is a pre-assembled connection system designed for medium-voltage cables. Its innovation lies in its simplicity: no complex tools, just fast, reliable installation that delivers ...

Our portfolio of passive components comprises termination and distribution cabinets, joint closures, splitters and aerial cable accessories that cater to various types of telecom and defence networks.

Features and applications of optical fiber quick connector/cold connector. Main features: good connection stability, low insertion loss, low cost of use, very fast installation speed and very ...

Our broad portfolio of electrical joints and splices are made for low, medium and high voltage electrical connections. These are engineered to withstand harsh conditions in extreme environments, providing ...

The Chardon Cold Shrinkable Straight Joint offers easy installation and reliable performance when jointing medium voltage cables. Made from high-quality UV-resistant silicone rubber, the cold ...

REPL range of Cold Shrinkable Joints are suitable for installations on medium voltage cables up to 36kV. The Joint consists of a moulded silicon rubber body with integrated central faraday cage and ...

Fiber Optic Fast Connector are used to connect two or more fiber optic cables or link cables to devices like routers, switches, or patch panels. These fiber optic network connection allow data to flow ...

Cold Shrink "All-In-One" Straight Joint CSJA ... to IEC 60502 with stranded circular conductors. Due to different conductor dimensions and/or cable constructions the mini and maximum application range ...

TE Connectivity's (TE) "All-in-One" CSJA cold shrinkable joint for 15 kV through 35 kV is designed to splice tape shield, wire shield, LC shield, UniShield, JCN and flat strap shielded cables. This one ...
