

UK Pipeline Temperature Measurement Fiber Optic Cable Factory

Our solution is based on the quantum mechanical RAMAN effect combined with our patented code-correlation measurements. A laser pulse propagating through the fiber results in back-scattered light ...

Our distributed fiber optic sensing technology is ideal for monitoring critical assets such as impounding basins, jetty pipelines, tank annuli, floating roof tanks, and ...

This contribution presents recent studies in the use of fibre optic distributed sensors for temperature profiling and leak detection in multi-layer insulated LNG pipes.

This contribution presents recent studies in the use of fibre optic distributed sensors for temperature profiling and leak detection in multi-layer ...

Whether you want to monitor the temperature, strain, vibration, or acoustic signals of your pipeline leakage, monitoring CO₂ and H₂ (onshore/offshore) storage, we have the right skills and ...

Fiber optic temperature sensors can multiplex tens to hundreds of measurement points in a single optical line without any compromise on measurement accuracy or reliability.

Optromix DTS 500 Series remotely measures temperature along a fiber optic cable of up to 16 km (10 miles) long in real-time. This fiber optic cable is not subject to electromagnetic interference, chemical ...

Our distributed fiber optic sensing technology is ideal for monitoring critical assets such as impounding basins, jetty pipelines, tank annuli, floating roof tanks, and pipelines.

Launched in 1998, Sensornet provides the world's most advanced fiber-optic distributed temperature sensing (DTS) systems for Energy applications such as HV power cable monitoring and leak ...

The FEBUS Optics solution can incorporate multiple algorithms. They analyze simultaneously temperature data along the entire length of the pipeline to enhance the robustness of the leak ...

DTS is a fibre optic temperature sensing technology that provides continuous and precise temperature measurement along flexible pipes using a cloud-based software where real time flow temperatures ...

The FibreSense DTS Control Unit connects to an optical fibre temperature sensor cable, measuring temperature and distance data at thousands of points along the cable, up to 10km in length.
