

In order to increase the flexibility of our IQS-3150 Variable Optical Attenuator, we have developed an option that integrates both a coupler and a power meter into the one-slot attenuator module. This ...

Santec's Optical Variable Attenuator, OVA-100, enables precise optical power control featuring high accuracy and superior repeatability. It can be used as a benchtop or rackmount instrument.

Learn how variable optical attenuators (VOAs) control optical power. Explore MEMS, LCD, and fiber-bend VOA types, specifications, and applications.

The N7752C two-channel variable optical attenuator for single-mode fiber enables highly efficient optical transceiver and network integration testing. It is equipped with two additional, independent optical ...

Explore the AQ2200-332 Optical Attenuator Module, featuring a variable attenuator and power meter for precise optical output monitoring. Ideal for bit error testing.

Single-mode and Multimode Variable Attenuator (VOA) can precisely add attenuation to four, eight or sixteen different optical paths; a Self-Adjusting mode is also available, which automatically monitors ...

Optical Attenuators Variable Optical Attenuators are available with single and multiple channels, stand-alone or integrated with optical switch and / or power meter capability.

Gloriole's Variable Optical Attenuator (VOA) can be applied to adjust the power levels of signals in optical communications at the output of light sources, E/O converters and for testing the linearity or ...

MEMS-based variable optical attenuator with fast attenuation speed, low insertion loss and in-built power meter. Its advanced power stabilization function lets you set and maintain the output power ...

Precision handheld instrument to test optical system margin & linearity. Superior specifications, high productivity and remote control make this a genuine laboratory instrument.
