

What does gj mean on the beam splitter

My understanding is that there is no true mechanical differences between GJ and GL models. The GJ is from 2012-2016 (including the world models) while the GL is from 2016 to present.

The GJ Tube is kept in position by either a small balloon or a bumper. If there is a balloon, it is inflated with a small amount of water once the tube is in position.

Unlike a g-tube, which ends in the stomach, a gastric-jejunal feeding device travels into the stomach, through the pylorus, and ends in the small intestine. The micro G-JET[®] was designed to meet the ...
