All-optical Ethernet switches are a type of switch that provides optical uplink and downlink ports, making them an ideal choice for building an all-optical campus network.

An optical network terminal (ONT, an ITU-T term), also known as an optical network unit (ONU, an IEEE term), is used to terminate the optical fiber line, demultiplex the signal into its component parts (voice ...

An ONT (Optical Network Terminal) is your gateway to fiber optic internet. This is an integral part of internet setup for users who have Fiber to the Premises (FTTP) or Fiber to the Home (FTTH).

In short: The OLT (Optical Line Terminal) is the central control unit of a Passive Optical Network (PON). It converts data signals, manages bandwidth, and connects hundreds of users over ...

Optical switches operate purely at the physical layer of the network, meaning they are concerned only with the physical path of the light beam. Because the signal remains as light, the ...

Switch was founded in 2000 by CEO Rob Roy and stands at the forefront as the premier data center designer, builder and operator, owning 100% of its land and facilities.

An all-optical Ethernet switch is a network switch whose service ports are entirely optical, meaning every interface uses fiber rather than copper. This design enables end-to-end optical signal ...
