

# Wholesale of Micro-module Immersion Liquid Cooling Systems for Mining Computer Rooms

Our wholesale partners offer a full variety of competitively-priced liquid immersion cooling units and components for electrical and electronically controlled systems. This includes electronic radiators ...

State-of-the-art technology needs innovative immersion cooling solutions. At Engineered Fluids, we help businesses like yours solve the toughest thermal challenges, with our application-specific engineered ...

Working directly with the world's top semiconductor, server and hyperscale technology companies, CoolIT designs and mass-produces highly optimized liquid cooling solutions.

Our total immersion liquid cooling system provides 1,400 times more cooling power than air. Using our patented Directed-Flow™ technology, we send the coolest fluid to the hottest electronic ...

LiquidStack holds multiple awards for building the world's most efficient liquid cooled data center solutions. From micro data centers to hyperscale sites, we have the experience to deliver your ...

Whether you're running AI, public cloud computing, private cloud storage, a high-frequency trading operation, or an on-premises data center, ICeraQ micro-modular, liquid cooling solutions from GRC ...

We've designed, built, and tested our blockchain mining heat exchangers in immersion cooling systems with popular Bitcoin miners such as the Antminer S17 Pro and S19 Pro series and Whatsminer M31 ...

An efficient, flexible way to expand, supplement, or replace traditional data centers or mining in permanent buildings. With a modular design, Midas can customize your mobile data center or mining ...

As a leading innovator in designing liquid cooling solutions for the crypto mining industry, we offer a new generation of immersion systems - the PRO10 architecture consisting of 3 solutions: PRO10 ...

Experience next-generation immersion cooling solutions from GRC. Our solutions increase performance, enhance sustainability and optimize TCO, setting new standards of data center cooling efficiency.
