

Why is the corrugated pigtail tube white

One common condition treated by pigtail catheters is pneumothorax, also known as a collapsed lung, which occurs when air leaks into the space between the lung and chest wall. Pigtail ...

A pigtail catheter is simply a smaller, softer version of a chest tube, with a curled "pigtail" tip. Both do the same job -- removing air or fluid from around the lung -- but the big difference is in size and ...

Pigtails should replace chest tubes for most pneumothoraces and pleural effusions requiring drainage. In this episode, I discuss points on use and ...

As fluid flow is dependent on tube's internal diameter and fluid viscosity, pigtails have generally been restricted to draining air or thin, free-flowing liquids.

Pigtails should replace chest tubes for most pneumothoraces and pleural effusions requiring drainage. In this episode, I discuss points on use and placement. The next post will be a ...

The chest tube connected to suction can be changed to a water seal or a closed seal drainage system when the lung appears to be nearly re-expanded or the majority of hemothorax has ...

If the tube isn't removed properly, it can make the patient's hospital stay longer, requiring patients to undergo another invasive procedure, and increasing the incidence of a spontaneous ...

For a small chest tube that might be used for a pneumothorax, typically only one dilator will be needed, whereas for larger chest tubes, progressively larger dilators would be used.

Depending on the intended use, corrugated tubing is manufactured in different diameters and from different materials, for example PA6, PA12, PP und PE. Even though these are usually rigid ...

Adults: Trauma carts should be stocked with 28Fr, 24Fr, 20Fr standard chest tubes and 14Fr pigtail catheter kits. It is recommended that we discontinue stocking larger sized chest tubes (32Fr, 36Fr) ...

It is highly effective for pneumothorax, a collapsed lung caused by air leaking into the pleural space. The small diameter is generally sufficient to manage this air accumulation, showing ...
